The Honorable Nancy Pelosi
Speaker
U.S. House of Representatives
Washington, DC 20515

The Honorable Kevin McCarthy
Minority Leader
U.S. House of Representatives
Washington, DC 20515

Dear Speaker Pelosi and Minority Leader McCarthy:

The undersigned organizations call on you to support public health professionals working nonstop to address the COVID-19 crisis across the nation. We strongly support the Public Health Loan Repayment Program included in the HEROES Act and urge Congress to create and fund this program as part of the next COVID-19 package.

The public health workforce is the backbone of our nation's governmental public health system at the county, city, state, and tribal levels. These skilled professionals are the primary resource necessary to deliver public health programs and services: they lead efforts to ensure the tracking and surveillance of infectious disease outbreaks such as COVID-19, prepare for and respond to natural or man-made disasters, and ensure the safety of the air we breathe, the food we eat, and the water we drink. Health departments employ full-time nurses, behavioral health staff, community health workers, environmental health workers, epidemiologists, health educators, nutritionists, lab workers and others who use their unique skill sets to do all they can to keep people in their communities healthy and safe. While the current COVID-19 outbreak has raised the profile of public health workers, they have a long track record of protecting our communities out of the spotlight, preventing illness and harm.

While the importance of these professionals cannot be understated, health departments across the country face significant workforce challenges to maintaining robust staffing levels and recruiting and retaining needed professionals. The public health workforce was hit hard by the Great Recession, and whereas much of the rest of the public sector workforce has recovered or grown, local and state health departments have not. In fact, local and state health departments have lost nearly a quarter (23%) of their workforce since 2008, shedding over 50,000 jobs across the country. The deficiency is compounded by the age of the public health workforce – nearly 55% of public health professionals are over the age of 45 and almost a quarter of health department staff are eligible for retirement. Between those who plan to retire and those who plan to pursue opportunities in the private sector (often due to low wages), nearly half of the local and state health department workforce might leave over the next several years. We need to do more to get the right people into these jobs and keep them there.

This is why the Public Health Workforce Loan Repayment Program is so important. It will help incentivize new and recent graduates to join the governmental public health workforce, encourage them to stay in these roles, and strengthen the public health workforce as a whole. It would provide up to \$35,000 per year in loan repayment in exchange for a two-year commitment to this important work. New staff and volunteers are being brought into the field for the COVID-19 response. This program would provide an added incentive to keep them long term and help ensure that their experience is harnessed and available before the next crisis hits.

Thank you for your commitment to our nation's public health. We look forward to working with you to make the Public Health Workforce Loan Repayment Program a reality.

Please contact Eli Briggs, Senior Government Affairs Director at the National Association of County and City Health Officials, at ebriggs@naccho.org, with any questions.
